Energy Assistance Propane Small Tank Agreement

LIHEAP participants using small propane containers (Portable tanks).

If you do not have receipts from your small tank propane purchases for the last year, LIHEAP eligibility will now be calculated differently.

Please read and sign the statement below regarding your LIHEAP propane pledge.

Participant Understanding

I understand that I have received a grant for propane heat that used the “propane back up amount”, which is the average of all propane grants in the County during the prior heating season. I understand that this calculation is for one-time only and that I need to save ALL propane gas heat receipts so that these can be used to determine my grant next heating season. If I do not have receipts for propane heat purchases next year, the Energy Assistance Program will use this year’s net grant amount as my usage for next heating season. This will result in a lower grant amount next season.
